Delivering reach for research

How we're using marketing automation to share the **right research** at the **right time** with the **right person**

Reaching readers

2.1 million readers reached annually

Delivers visibility for articles and journals

A showcase of the latest research delivered to readers via email

Tailored to readers' subject preferences
Featuring personalized calls for papers
Including publishing guidance from Author Services

Content is always relevant so readers never opt out

Our unsubscribe rate is **6x lower** than industry average

Informing authors

Helps authors to share their newly published work

Automated alerts at key stages in the publishing journey

Accepted manuscript · Version of record · Assigned to a journal issue

Links to access 'Authored Works'

Authors can download the PDF or view the HTML of their article

Sharing services

Free e-prints for authors of non-OA articles to share their work with peers

Quick links to share on social media

Brand visibility for individual journals in every alert

Adapts to every journal's publishing model

Informed **180,000+** authors in 2018

380,000 free e-prints issued

Tracking impact

Enables authors to track their research impact

Authors receive article metrics updates 6 and 12 months after publication

Quick links to share on social media

50% of researchers opening 6-month updates click on social media links

Citation alerts powered by WEB OF SCIENCE™

Including links to citing article

Click-through rate for citation alerts is **6x higher** than industry standard

Growing journal circulation

Helps librarians to meet their users' needs

Tracking access requests at institutions globally to inform librarians of their users' needs

Tracking institutional research output to update libraries on researchers' publishing activities

Leading to tailored content solutions based on current and emerging reader and author behavior

Grows individual journal circulation and impact

Taylor & Francis Group
an **informa** business
